# That's PCON: Top drawer bathroom culture

Whether it's a guest bathroom or a fresh centre for the whole family, PCON gives you room to unfold. In all dimensions and with ambitious manufacturing quality – uncompromising and tailor-made to your wants and needs.

## Tailor-made

Design your dream bath according to your own spec, made with precision based on the dimensions given – completely to your taste. Roof slopes, annexes or corners – not a problem for PCON. For us, your desires are the measure of all things.

## High quality

Pelipal has developed the PCON programme as an extensive planning system, which brings the most ambitious bathroom ideas to life with almost endless combinations and options for adaptation at high quality with solid finished components – **Made in Germany.**

## Ambitious

Limitless, exclusive and functional – that is what we boast for the development and design of our products, no more and definitely no less. The good form and function always creates an inseparable entity at PCON.

If you see this symbol on a photo, you can find out more information on page 78 under the given number.

The "VARIABLE" arrow identifies furniture that is available in various sizes according to your requirements.

step 1 /

### Room analysis - what are the requirements and what do you want?

Slopes, annexes and niches in the bathroom are very common and need to be taken into consideration. The floorplan forms the basis for planning, then PCON creates the options to display in your bathroom.

The first step to your dream bathroom!

step 2 /

### The washstand – the centre point of your bathroom

The washstand is made up of a washbasin, vanity unit and mirror cabinet or mirror.

The position of the washstand is usually fixed due to the connections. Of course, this should also be considered when planning. PCON puts the washstand at the centre and organises the other building blocks around it.

You have the choice: Material, form, fittings and size completely as you wish!

# My PCON dream bathroom – step by step

### step 3 /

#### The additional units - parts come together to make one system

Creating storage space right inside the bathroom is important. Lots of small parts have to be accommodated, the smallest things need their place.

Here, PCON offers individual solutions and a large range of furniture and accessories - this creates order and the necessary free space because everything has its own place.

### step 4 /

#### Good advice - the best possible experience

Speak with our qualified retailers!

The advisors are specially trained and will find the right solutions with you, right down to the details.

Welcome to your dream bathroom!

from a simple bath ...

BEFORE

... to a true space-saving miracle!

## AFTER

Washstand with countertop basin, mirror with functional toolbar and LED counter lights, tall cabinet and side cabinet with open surfaces

Front and carcass decor: Pine Ida, cross-grain, imitation

# Your brand ceramics in the best company

Add to your existing washbasin with the right base unit or choose the complete set consisting of:

- 1 Brand ceramics
- 2 Washbasin vanity unit
- 3 Mirror cabinet

The selection of brand ceramics is very large – you can choose between over 100 different models from the five leading brand manufacturers:

DURAVIT

KERAMAG

Villeroy & Boch  
1793

ideal  
STANDARD

LAUFEN  
bathrooms

Front and carcass decor: Anthracite high gloss

## The brand washbasin has a shiny new look

The smart lighting doesn't leave you stumbling in the dark but instead lets your bathroom shine in a new light. To do this, there are counter lights and LED light surfaces left and right of the mirror cabinet - the perfect light for make up and skincare.

The lighting on the vanity unit is controlled by a movement sensor and helps you to orientate yourself in the bathroom. All light sources shown are fitted with LED light technology.

INFO 1

The mirror cabinet with left and right side lighting and LED top light gives you lots of space for small parts and accessories.

The wide seating bench in the same design has even more space for important and gorgeous accessories for day to day care.

The brand ceramics from Villeroy & Boch create an elegant connection with the vanity unit from PCON, and are available in several widths.

Front: White high gloss  
carcass: Riviera Oak,  
cross-grain, imitation

KERAMAG has various washbasin ranges in different measurements.

The mirror can be individually and precisely adjusted to within a millimetre for height and width according to your space situation. Even bevel cuts on roof slopes are no problem. PCON loves unusual spaces.

Front and carcass decor: Quartz grey high gloss

KERAMAG

Front and carcass decor:  
Sangallo brown,  
cross-grain.

The mirror cabinet  
with top light has  
double mirrored  
doors and a  
plug socket inside.

Further space is provided  
by the wall unit with the  
white rounded shelf  
underneath as a  
decorative eye catcher.

## KERAMAG

The vanity unit is fitted with an LED night light underneath.

Front and carcass decor:  
Riviera Oak, cross-grain, imitation

The seat chest has additional storage space for small and large bathroom accessories.

## KERAMAG

The base unit with the 'Sangallo Grey, cross-grain' decor has two spacious drawers, shown here in combination with the elegant washbasin from the KERAMAG range.

The mirror shelf provides even more storage space and is also a large dressing mirror.

On the mirror cabinet, the LED top lights and the band of light running along the mirror provide a perfect lighting partnership – and they look good too.

# My dream bathroom made to measure

PCON is variable and flexible. You can see this especially with our various sizes of washbasins and furniture. Here, there are plenty of combinations of width, depth and shaping, so you will easily find the right solution for any room.

Choose a washbasin that fits your taste, you can choose from three materials: mineral marble, glass or Krypton. With PCON, plan the best combination of mirror cabinet and additional units and find the best decor for them.

Be inspired!

# Straight, direct and simply beautifully

## MINERAL MARBLE

The modern material for washbasins - robust, non-porous, low maintenance and versatile in shape.

Together with the elegant optics of the straight base units, this is a combination that wins you over across the board with its design and functionality.

Left:

The mineral marble double washbasin and the base unit are of variable width. The LED lighting in the shadow joint provides the best view into the drawers and a great lighting effect in the room.

Front and carcass decor: Sanremo Oak, cross-grain, imitation

Top right:

The intelligent toolbar on the mirror for accessories makes it easier to get organised and guarantees quick access.

Bottom right:

Organisation from cosmetic drawer inserts in the drawers - everything has its place.

## Good design shown in the right light

The top lights above the mirror cabinet are mobile – for direct or indirect facial lighting as required. The built-in lights on the left and right of the mirror cabinet prevent shadows on the face.

Generous double washbasin – meaning there is always space for two people in the bathroom.

The light sources on the bottom of the mirror cabinet lights up the washbasin as needed.

The LED light on the bottom of the vanity unit provides a great look and lots of light in the drawers.

Front and carcass decor: Sanremo Oak, imitation

03 - Various sizes of washbasins and furniture - mineral marble - rounded

## Elegance with gentle momentum

As washbasins made from mineral marble can be produced in almost all shapes and sizes, the material is also very suited to rounded base units. Here, the gentle rounding of the cabinet can be done even on the washbasin.

The mineral marble washbasin in a rounded look with base unit can be ordered in a range of widths.

Front and carcass decor:  
Graphite texture, cross-grain, imitation

Top right: Mineral marble double washbasin with turning door in the centre, the mirror cabinets have asymmetric distribution, the variable mirror panel in the centre has two plug sockets.

Front and carcass decor:  
Castello oak, cross-grain, imitation

Left: Mineral marble washbasin and base unit are width-variable and available with the option of LED additional lighting, mirror cabinet with LED top lights and washbasin lighting

Front decor: White high gloss  
Carcass decor: White gloss

INFO  1

Left: Check out your complete look: the side cabinet and in the mirror cabinet with three double mirror doors and the top light LEDplus with colour temperature change.

Mineral marble washbasin with width-variable base units

Front and carcass decor: Riviera Oak, cross-grain, imitation

Right: combination variable in size as a double washbasin in perfect shape, with mirror plus top lights in chrome gloss.

Front and carcass decor: Castello Oak, cross-grain, imitation

## Glass washbasins – transparent ease

Elegant curve shows the glass washbasin made from 12 mm strong glass in Optiwhite with its soft rounding on the inside and the base unit adapts perfectly to low depths. This gives you freedom to move.

Front and carcass decor:  
Graphite texture, cross-grain, imitation

Plug socket with cover  
metal effect

Direct access to the  
day to day accessories via  
the toolbar with hooks and  
shelves.

Glass washbasin in Optiwhite  
with notching and perfect  
fitting base units – as the room  
demands.

Combination of size-variable  
mirror cabinet, function panel  
and mirror.

Additional space due to base  
unit on stud feet.

## KRION: High tech in form and function

One of many creative ideas: the precisely measured milling in the counter serves as a towel rail.

The basin in the KRION washbasin is always white matt, the counter can be delivered in white matt, natural sand (see photo) or natural grey.

Vanity unit in varnished laminate with two pullouts and two doors  
Front and carcass decor: Quartz grey matt select

## KRION – the new washbasin material

The new material for washbasins wins you over with its elegant matt look, particular haptics and many positive features.

Krion is made from two thirds natural materials with high proportions of minerals.

With its low maintenance, non-porous state, KRION prevents the growth and spread of bacteria on its surface. The material is UV-resistant, non-inflammable and resistant to chemicals. As such, KRION is particularly good for the bathroom area.

KRION washbasins are in the decors: White matt, natural sand and natural grey available with the basin always in white matt.

The front of the furniture and additional units are made from laminate varnish - a material with particularly comfortable haptic features and very elegant colour decorations in six variations.

The basin in the Krion washbasin is always white matt, the counter can be arranged in white matt (photo), natural sand or natural grey.

The KRION washbasin with matching base unit is available in two depths:  
425 mm or 495 mm.

The width can be adjusted from 760 to 3000 mm.

Washbasin here in white matt, front and carcass decor: Quartz grey matt select

The KRION washbasin can be planned individually: Millings for towel rails or glass holders are possible, also different notchings, roundings or bevels. That way, everything fits in twisted or non-right-angled room constellations.

Stylishly coordinated: the additional units have a top cover made from KRION in matching decor: White matt, natural sand or natural grey (see photo above)

# Good design is individual

It's your choice – as always at PCON: Countertop basins on counters or inlet basins inside counters. Every one has its own look and you decide what you like.

The counters are variable in terms of width and depth and can be ordered in different materials, decors and two thicknesses.

Inlet basin with counter (thickness: 18 mm)  
in Riviera Oak, cross-grain

Front decor: Metallic steel grey  
Carcass decor: Riviera Oak, cross-grain, imitation

## 04 - Worktop and inlet washbasins

A solution with lots of mirrors, storage space and additional shelves.

Easily adapt this attractive combination to the width of your room!

Front and carcass decor:  
Sangallo grey, cross-grain  
Counter: White texture

VARIABLE

Combine a mirror, mirror cabinet and shelf for maximum use and gorgeous design!

In our programme: additional units with lots of storage space, as shown here by the tall cabinet with open shelves.

Do you want more shelves on the washbasin?  
No problem: The counter can be ordered in  
different lengths and widths.

Here, smart design and functionality  
come together.

## My bathroom – truly strong!

This way, bathroom furniture becomes a design object – almost as if it were your living room. Here is a combination made from: Counter in Riviera Oak, cross-grain, imitation and front or carcass decor: in white high gloss

Choose from the versatile range of front decor and combine them to your taste!

The counter can be delivered in six different decors.

You can also determine the thickness of the counter: 18 mm or 40 mm (see photo).

## The soft, light curved lines

For people who love gently curved shapes, the counter is also available width variable and with a precise contour cut.

Combined with a double washbasin with maximum storage space, this solution becomes a designer piece.

## Sophisticated right down to the last details

The cabinet contains a removable laundry container and is easy to fill from above with the flap.

Sophisticated right down to the last details and with space for your favourite decoration.

## 04 - Worktop and inlet washbasins

Light and clear shapes create lots of closed and open storage space.

The shelf boards can be ordered to size as you wish and according to your bathroom specification.

Straight and curved lines  
perfectly combined

## Excitement with shape and colour

Countertop basins on a depth-variable glass counter in black

INFO  3

Very practical: tall laundry cabinet with lots of storage space and full pullout incl. a removable laundry container.

Front and carcass decor:  
Pine Ida, cross-grain, imitation

With PCON's lighting options even at night  
all your dreams will come true.

## Combination with glass: A highlight day and night

# The right answer to any question

Particular needs require particular solutions. PCON is attuned to its clients' wishes and provides perfect solutions, for example: a family bathroom where every family member has their place, or a generation bathroom where you can feel comfortable at any age, or a utility room that works as a bathroom without having to cut back on design and an elegant environment. The right solution – for us that means:

PCON - UNCOMPROMISING

## A strong ensemble

The heart of the room: a small washstand including storage shelf and storage space

Front and carcass decor: Sangallo brown, cross-grain

Generous wall units for storage and perfect organisation.

All within reaching distance: the washing machine and dryer can be easily loaded and the drawers underneath provide space for the necessary utensils.

This cabinet has lots of storage space for larger things too and in the centre there is a full pullout with removable laundry bag.

## The family bathroom

A bathroom that the whole family can fit in stress free – everyone has a place – contributes to relaxation and makes for the perfect start to the day.

With PCON we make it possible to use any room optimally – completely as you wish. Counters, vanity units, mirror cabinets or mirrors can be selected in different heights and widths. Even top corner solutions and children's washstands are feasible – making room planning pure fun. The only other way to get that is by using a carpenter.

Above-corner construction

## Rendezvous with washing machine

Is your washing machine in your bathroom but doesn't feel right there?

With PCON, your washing machine will become a natural part of the bathroom without becoming out of place – on the contrary: this washbasin and washing machine make one nicely formed functional unit.

Combination of mirror with lighting, shelf and cabinet, super practical: the toolbar with accessories for hooks and plugs, for accessories with direct access

Washing machine and washbasin are connected with elegant inner rounding by a size-variable counter (thickness 40 mm). In particular: the counter is also variable in depth up to a maximum of 700 mm.

## Generation bath

Every generation has the right bathroom:  
even if the requirements change with time.

With PCON, that comes with a good floorplan and  
smart, individual design right down to the last details.

Order needs space  
and organisation:  
Cosmetic inlets for  
the drawers.

Under the washbasin  
there is space for seating  
for example the stool  
from our programme  
of additional units.

The depth of the counter  
is variable.

The lighting on the vanity unit  
with motion sensor makes  
it easy to get about in the  
bathroom even at night.

With the hooks on the  
inside of the cabinet  
everything is always  
ready to reach straight  
away.

VARIABLE

# PCON – Your choice

PCON – UNCOMPROMISING: that is our motto and we work constantly to meet this claim as closely as possible. That means: Your wishes and imaginings take first priority for us. With PCON, we have developed a programme with a kit system that can be adapted to your individual needs, elements can be brought together and combined as you wish.

Choose the material of your washbasin and the material of your base unit, the right decor, handles, mirror cabinet or mirror, the art of lighting - all completely to your taste and plan your dream bathroom to the millimetre:
